

UP TO

WOOD

FOREVER WOOD. FOREVER MEMORIES.

It has been around you forever.

In the melody of the sparrow, in the sweetness of the berries, in the bliss of your swing and in the comfort of the shade.

It never asked you for anything. The times you needed shelter from the rains, whisper sweet nothings to the hatchlings or simply needed to embrace something familiar, it greeted you with a smile. Even when you never thanked, or acknowledged it, it was always there for you. Those memories may have been lost to time. Wood, however, continues to endure.

The eternal nature of wood inspires Mikasa Real Wood Floors to gift those memories back to you, offering designs that rivet the attention of all who come across it. From the rustic and earthly to the warm and inviting, our collection offers a wide variety that leaves little to imagination.

NOW CHERISH THOSE MEMORIES. ALL OVER AGAIN. GROW UP TO WOOD.

Mikasa ADD

Benefits of adding Mikasa into your life.

Availability

The most popular wood species from across the globe made accessible to you with our large sales and service network across the country.

Design

Your floor becomes an integral part of your total décor. Mikasa spoils you for choice with the largest variety of decors to choose from.

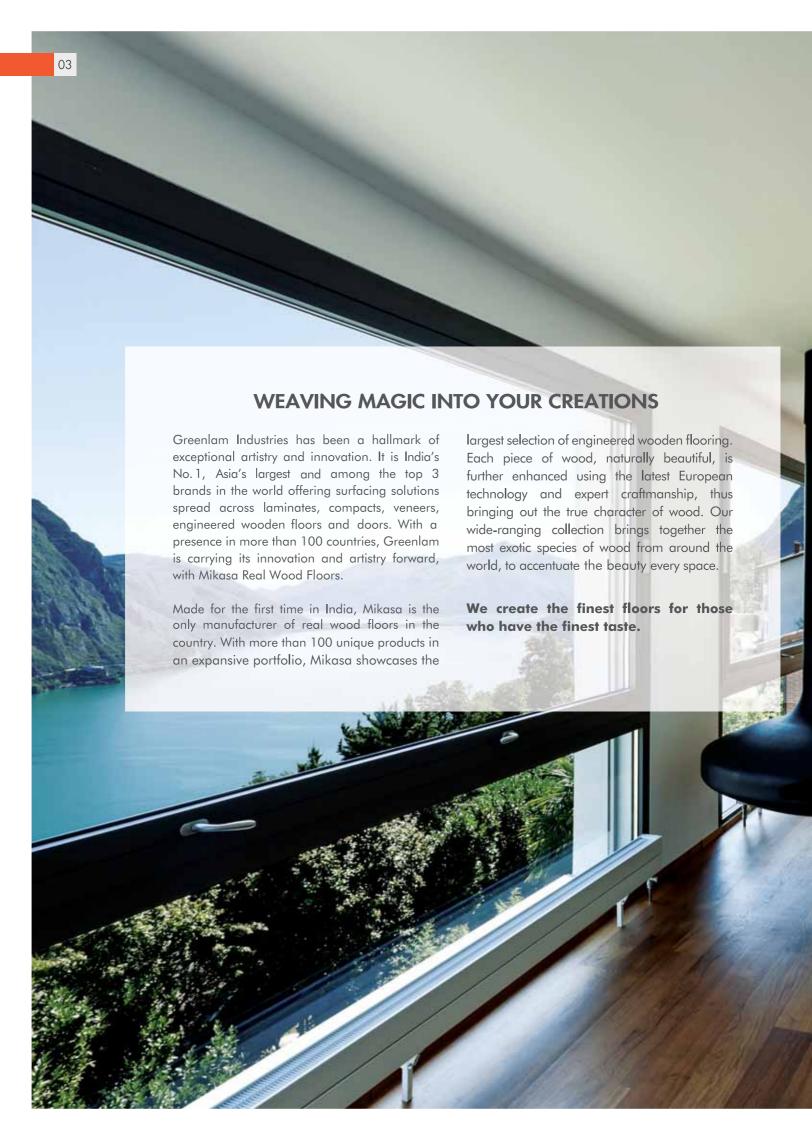

Durability

The first and only brand of wooden floors manufactured in the country with the latest technology, resulting to products fully supported with warranties of up to 30 years.

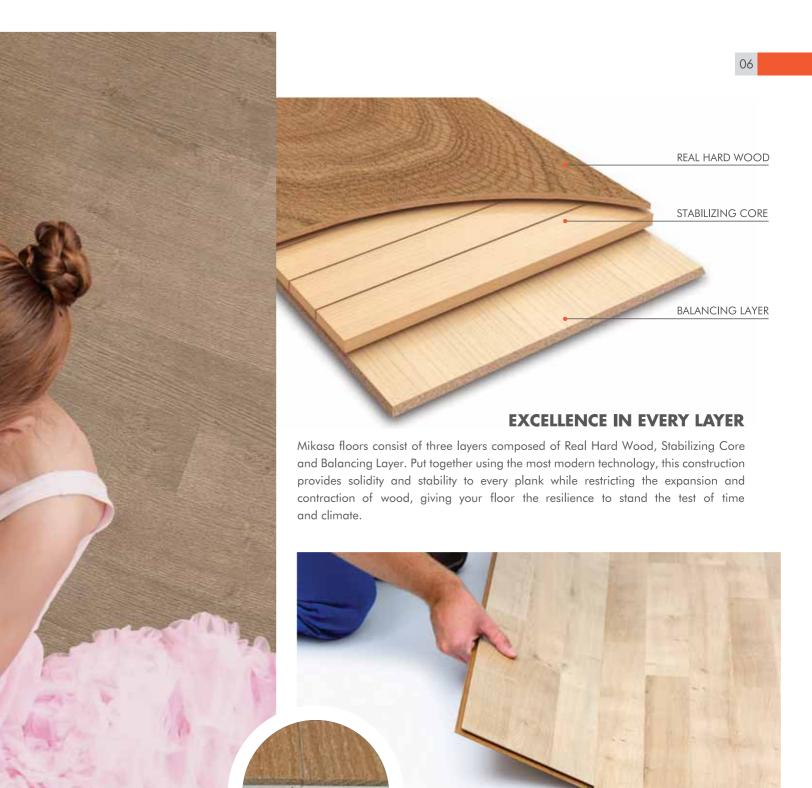

THE BOND THAT LASTS FOREVER PlankL $\mathfrak{C}^{^{\mathsf{TM}}}$

A revolutionary technology that locks two planks together without using glue, ensuring that the joints that bind the two planks never open up.

PlankLŒ[™] allows for ease of installation, giving a seamless look to your floor that withstands the effects of seasonal change and foot traffic.

FINISHES

SATIN LACQUER

Adds lustre to the wood without hiding its character. It makes the surface pleasing to the underfoot as well as being easy to maintain.

MATT LACQUER

Gives an impression of pure and untreated wood. The subtle finish does not conceal wood's natural look while making it more durable and easier to clean.

BRUSHED

The natural structure and texture is accentuated by mechanical brushing. Enhance the beauty of a brushed floor with other treatments such as a bevelled-edge or coloured stain.

SMOKED

Wood, especially Oak, is processed to infuse a dark and smoky look to each plank. Preferred by the imaginative and artistic.

STAINED

Adds elegance and a layer of sophistication to any wood. The finish harmonises the wide variation of natural wood without covering its natural detail.

EDGES

BEVELLED EDGE

Dramatically accentuates each individual plank, resulting in a more traditional floorboard feel and lends a more rustic and classical impression.

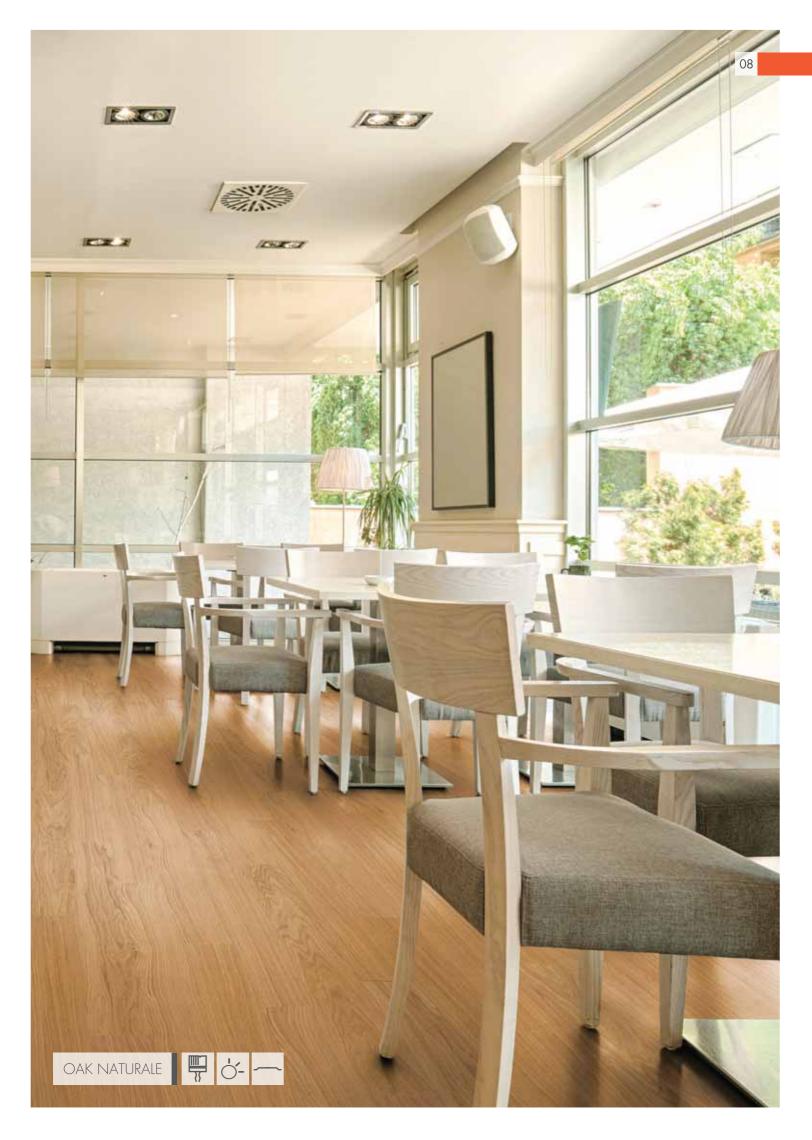

MICRO-BEVELLED EDGE

Small, eased edges are virtually unnoticeable in between plank heights and offer a seamless connection between joints.

SQUARE EDGE

Creates a smooth, uniform surface that fuses the wood floors together from plank to plank and provides a contemporary and sleek look.

BEAUTY IN EVERY STRIP

2—Strip: Each plank displays a 2-Strip pattern to create a distinct and individual look. Ideal for mid-sized rooms. Unique mix of patterns give the room an expansive and open appearance.

3—Strip: The versatile and imaginative 3-Strip style accentuates any room size by fusing the vintage parquet floor impression with a modern edge and flair without any hassle.

Herringbone: The versatile range of Herringbone collection allows the flexibility to customise every living space.

THE LONG AND SHORT OF REAL WOOD

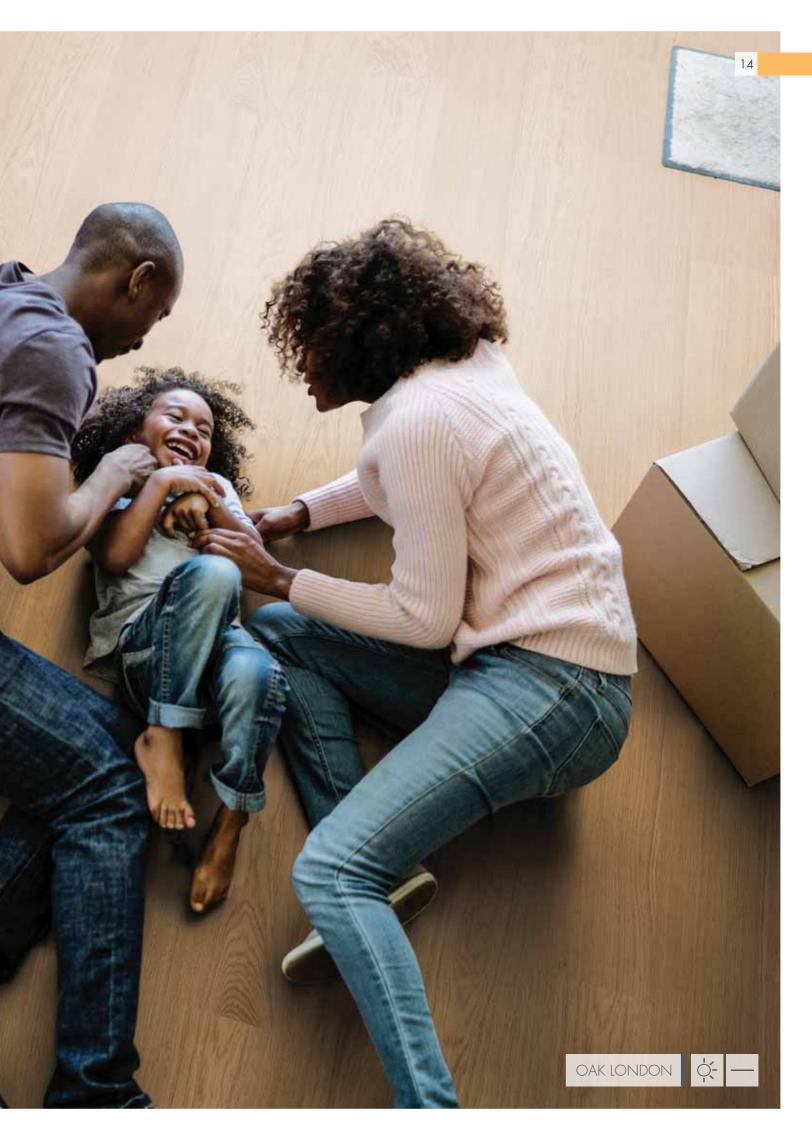

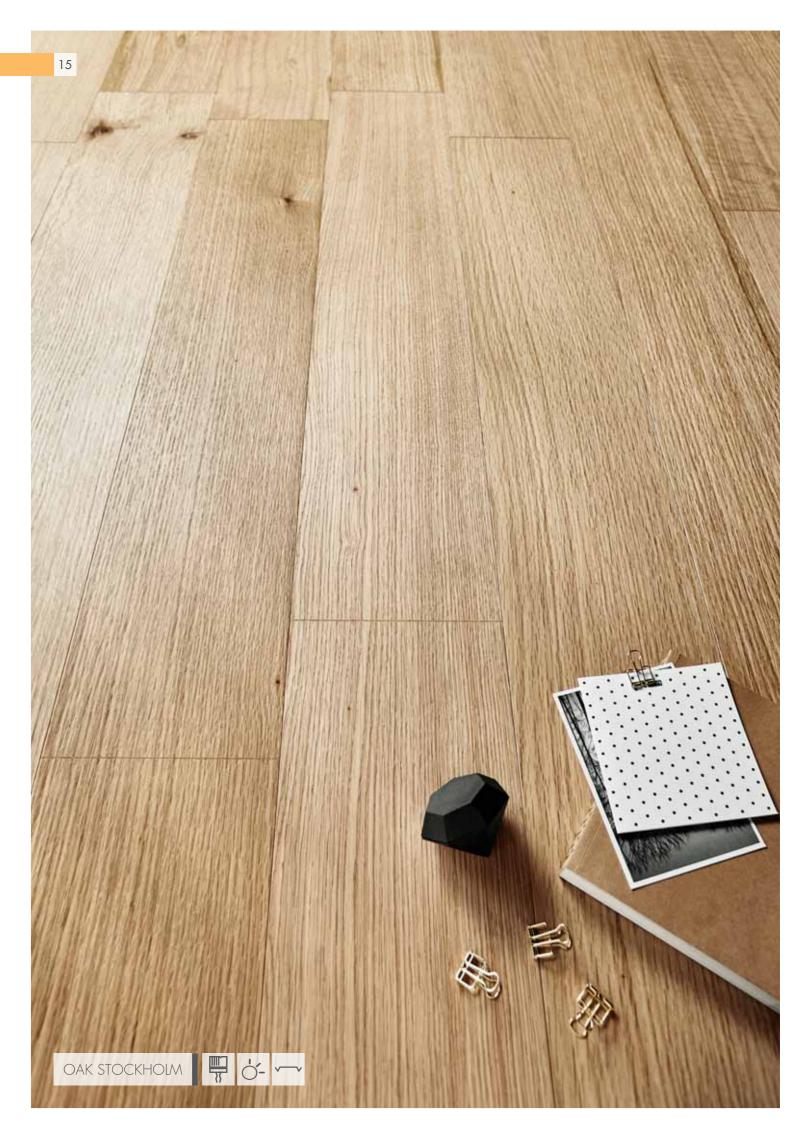

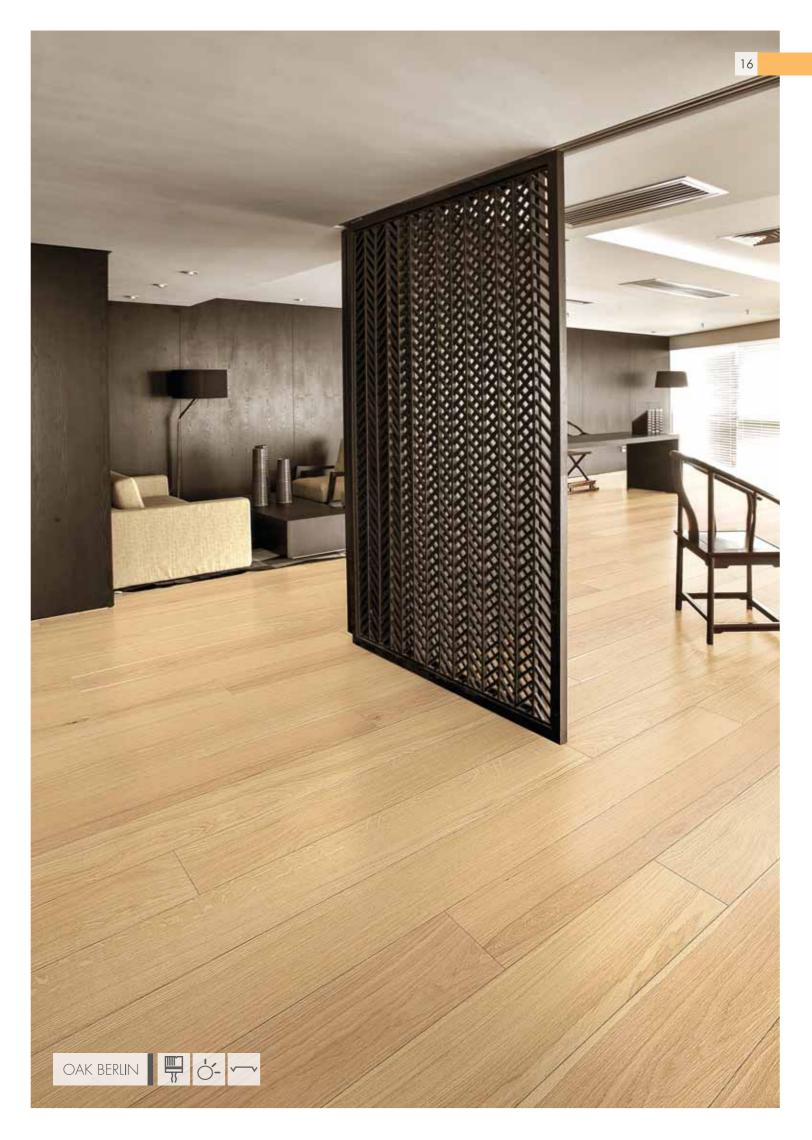

DID YOU KNOW THAT CUTTING TREES CAN HELP SAVE THE ENVIRONMENT?

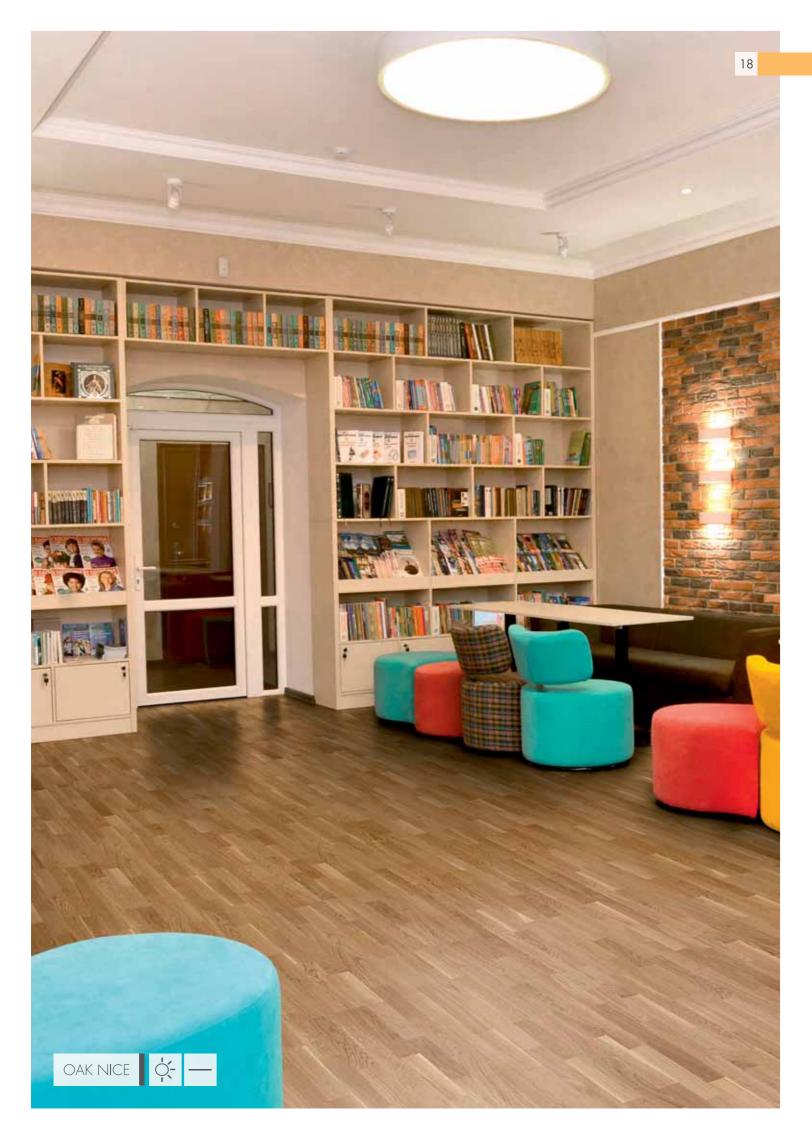

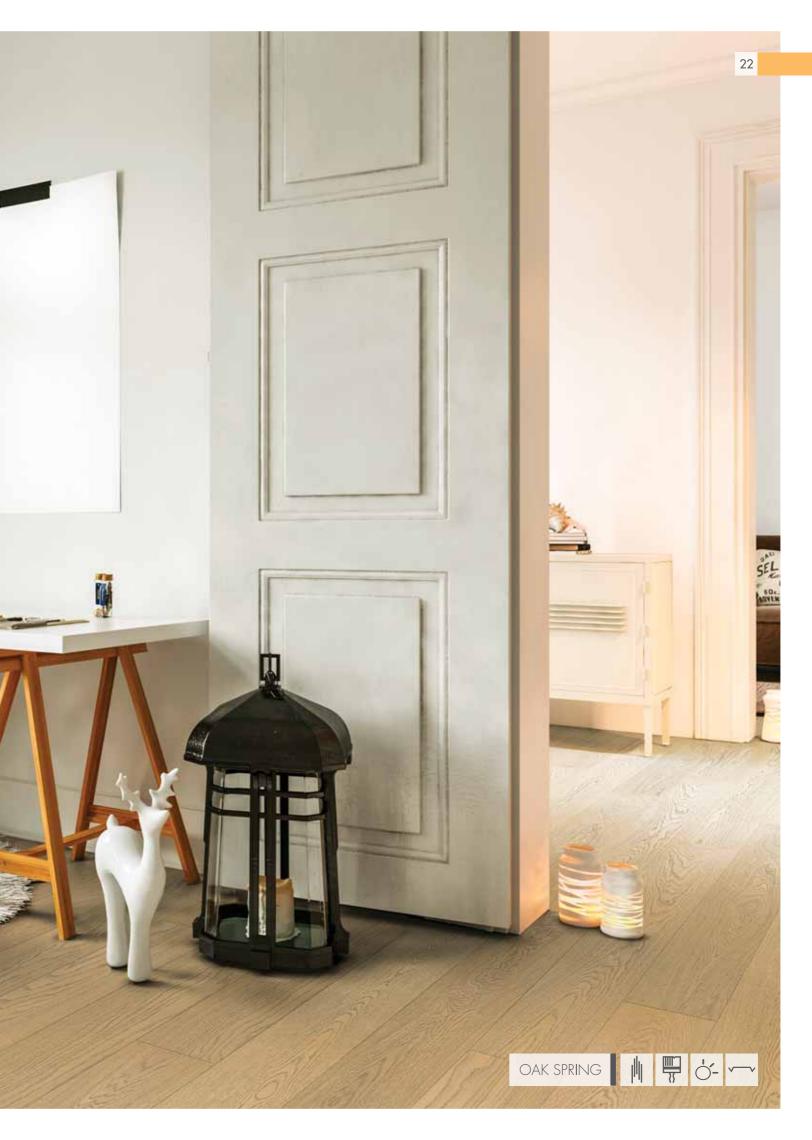

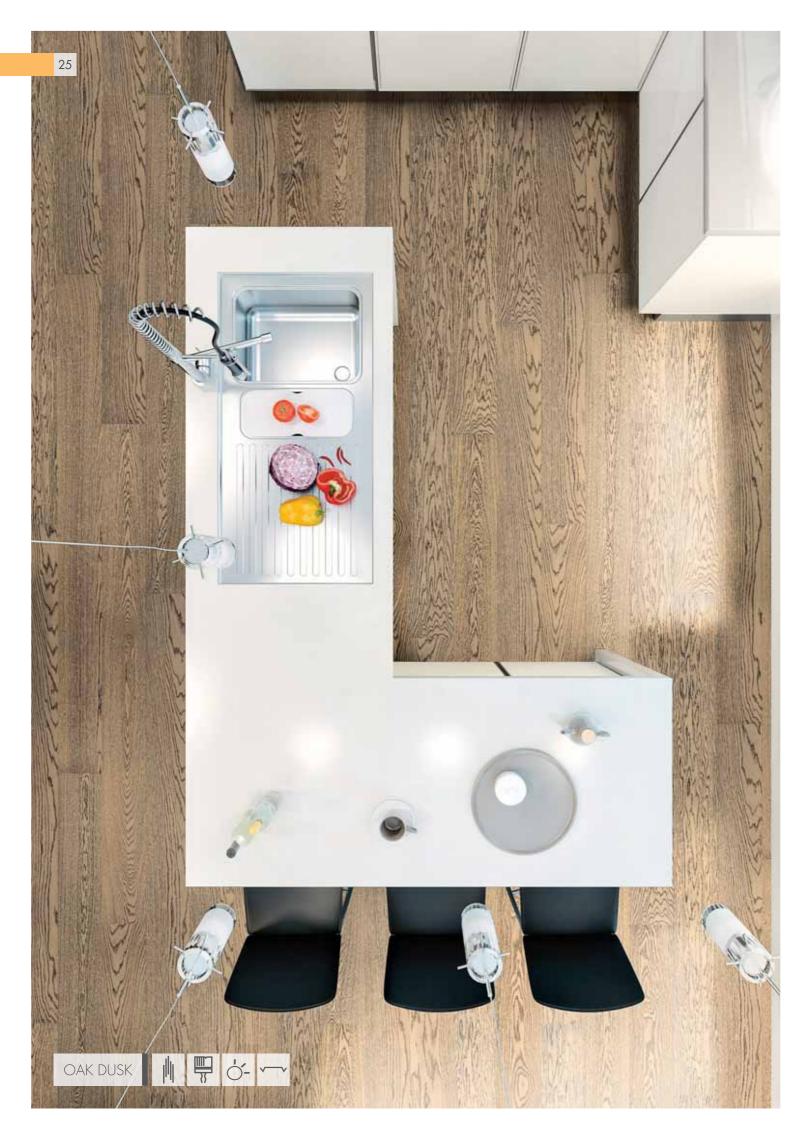

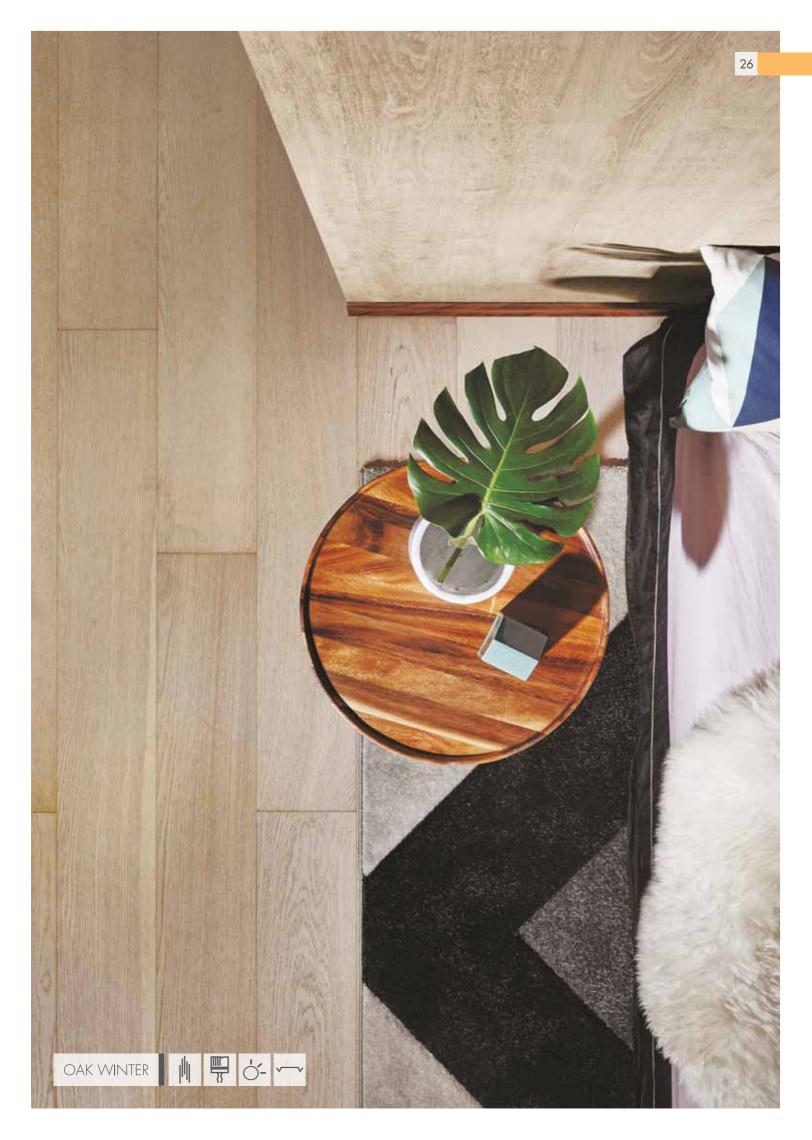

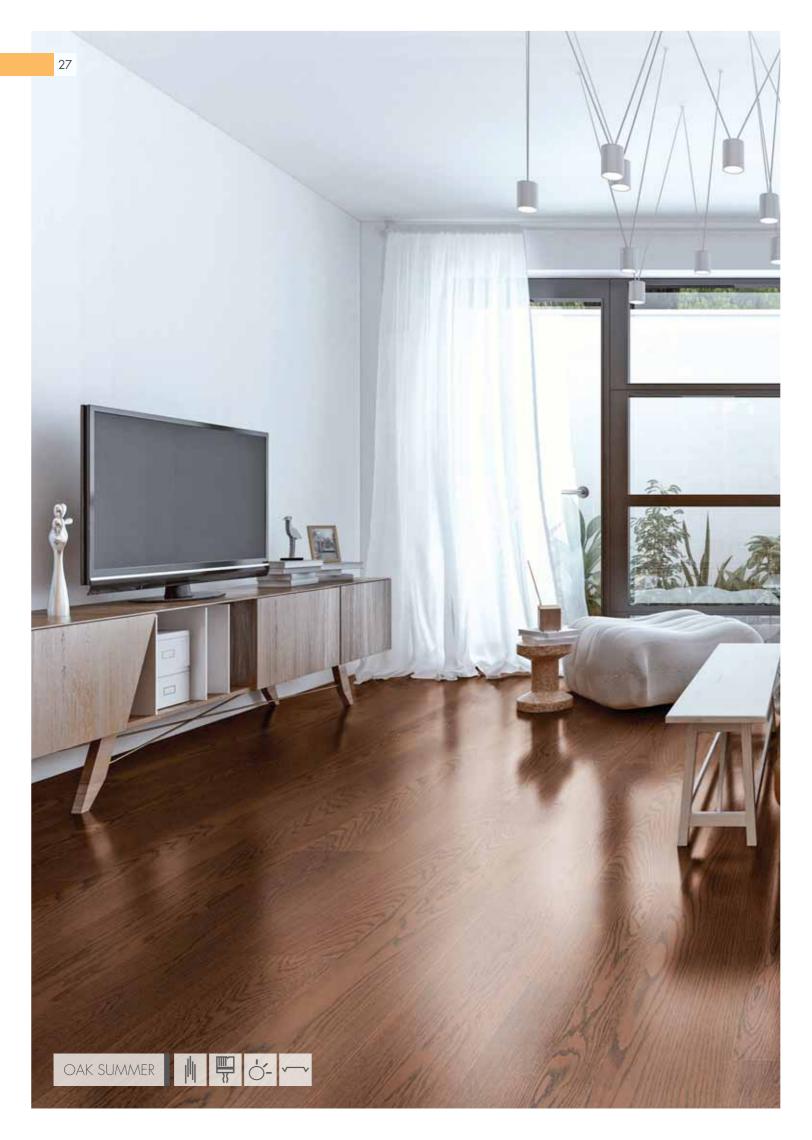

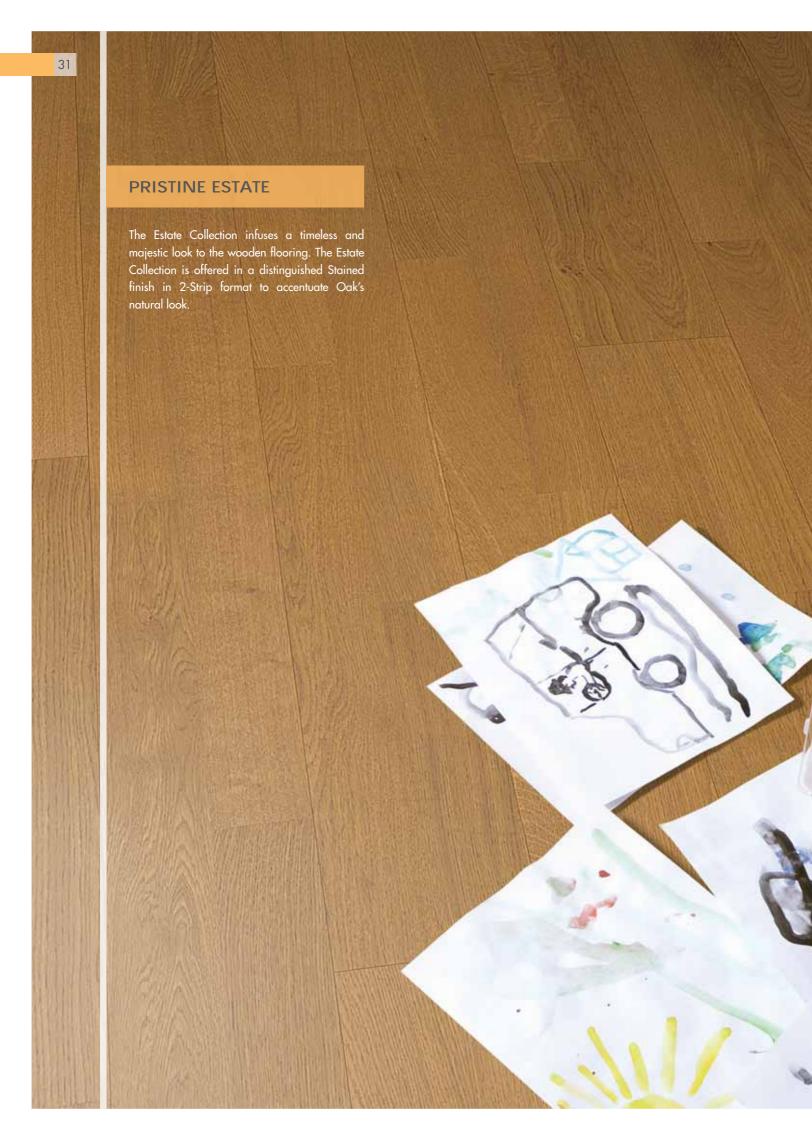

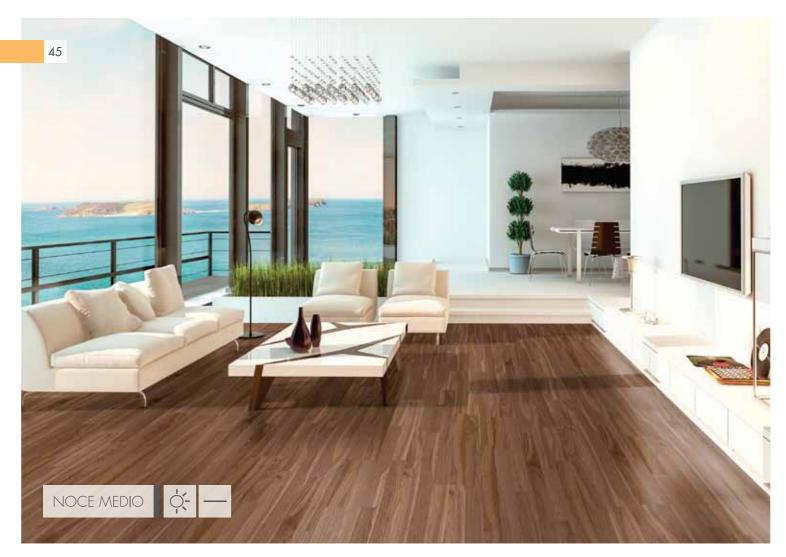

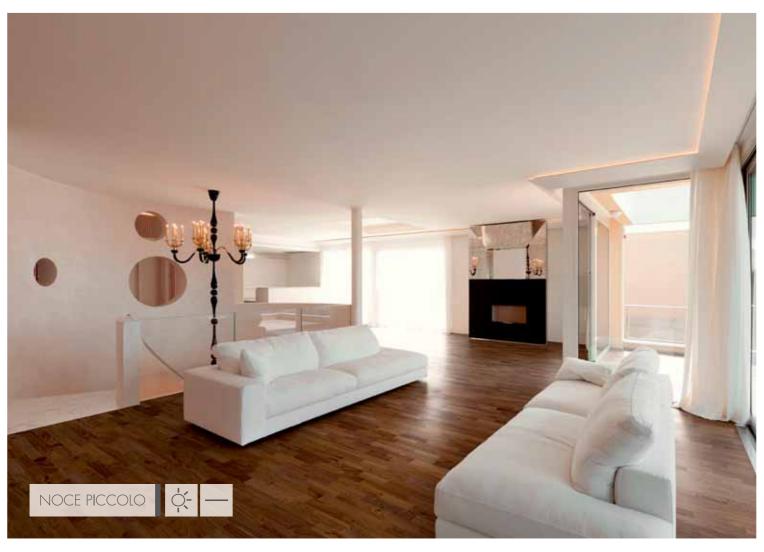

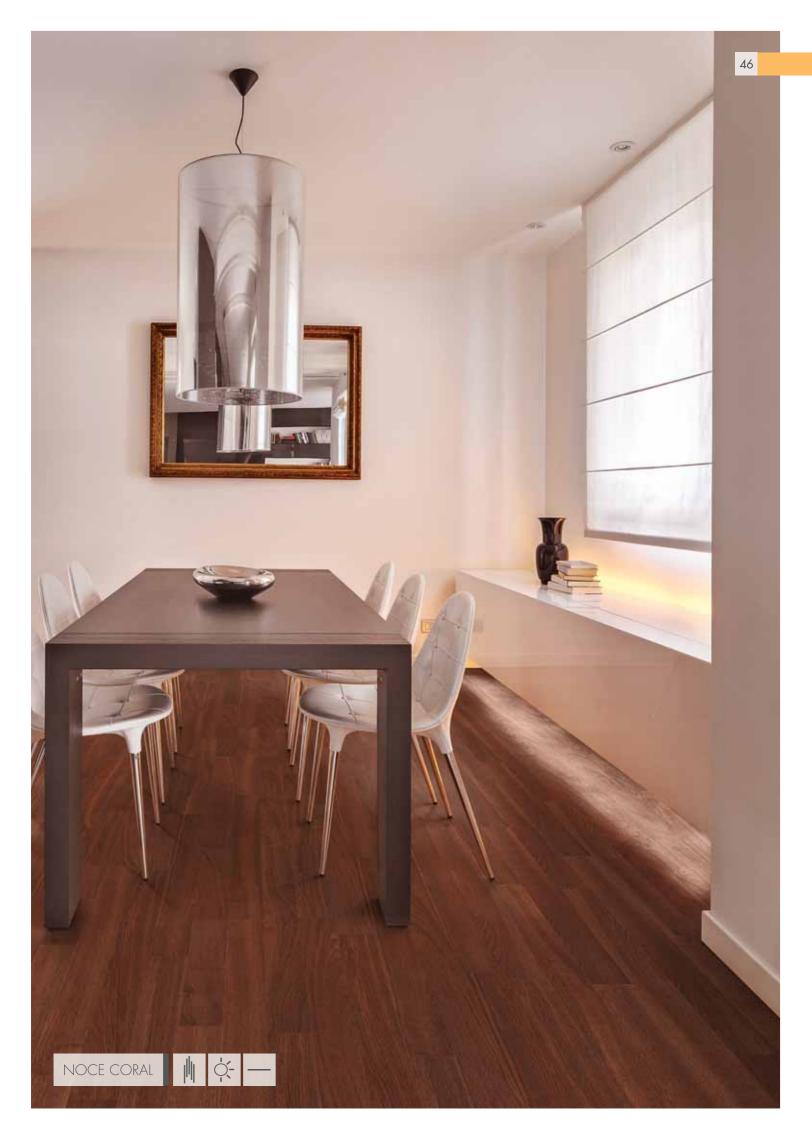

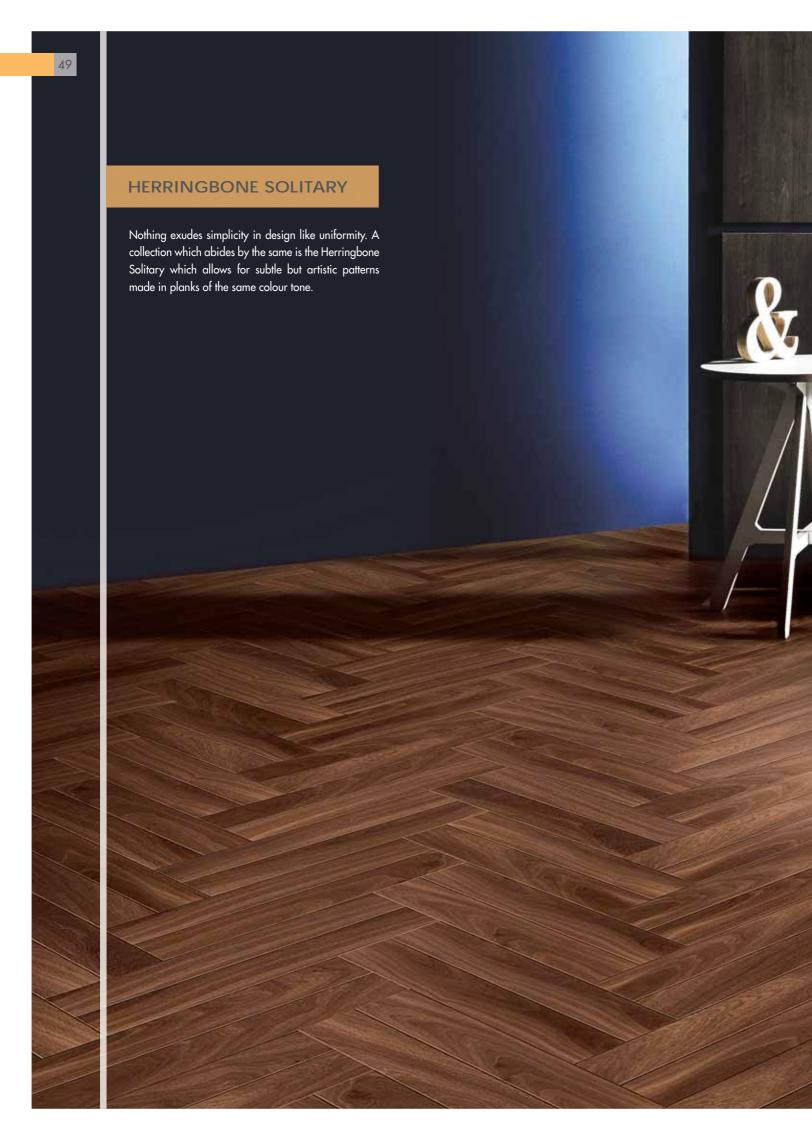

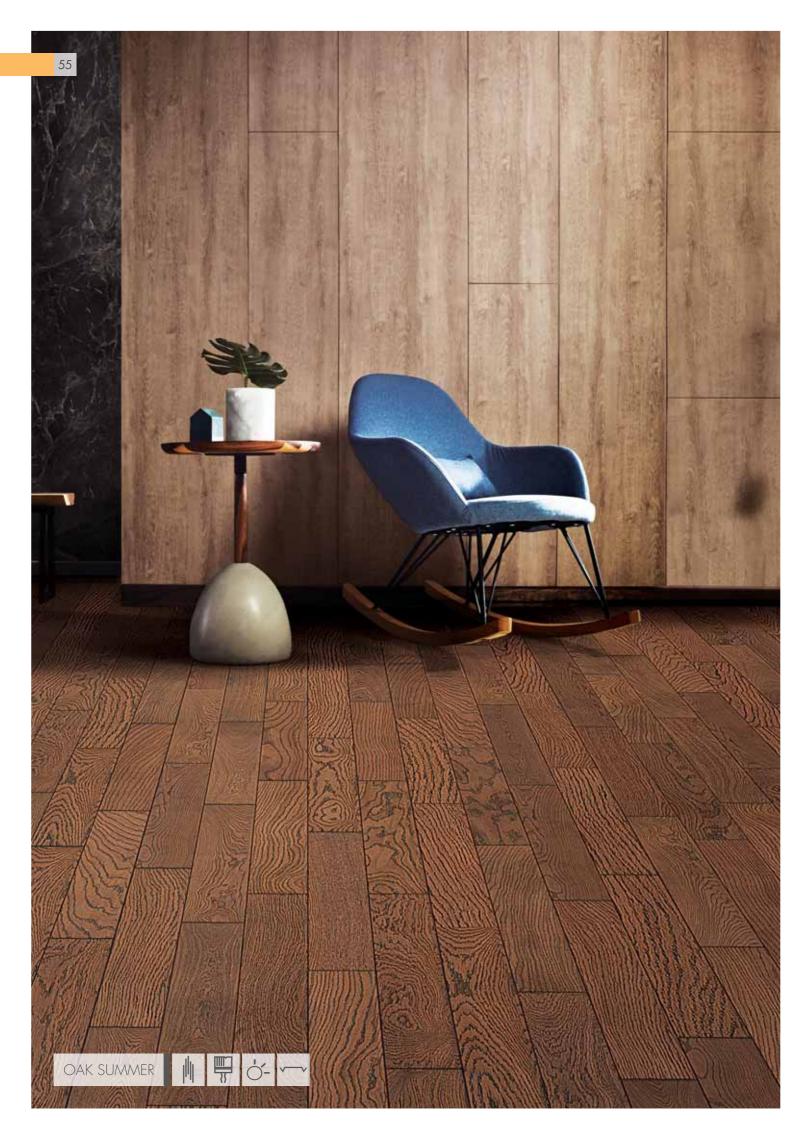

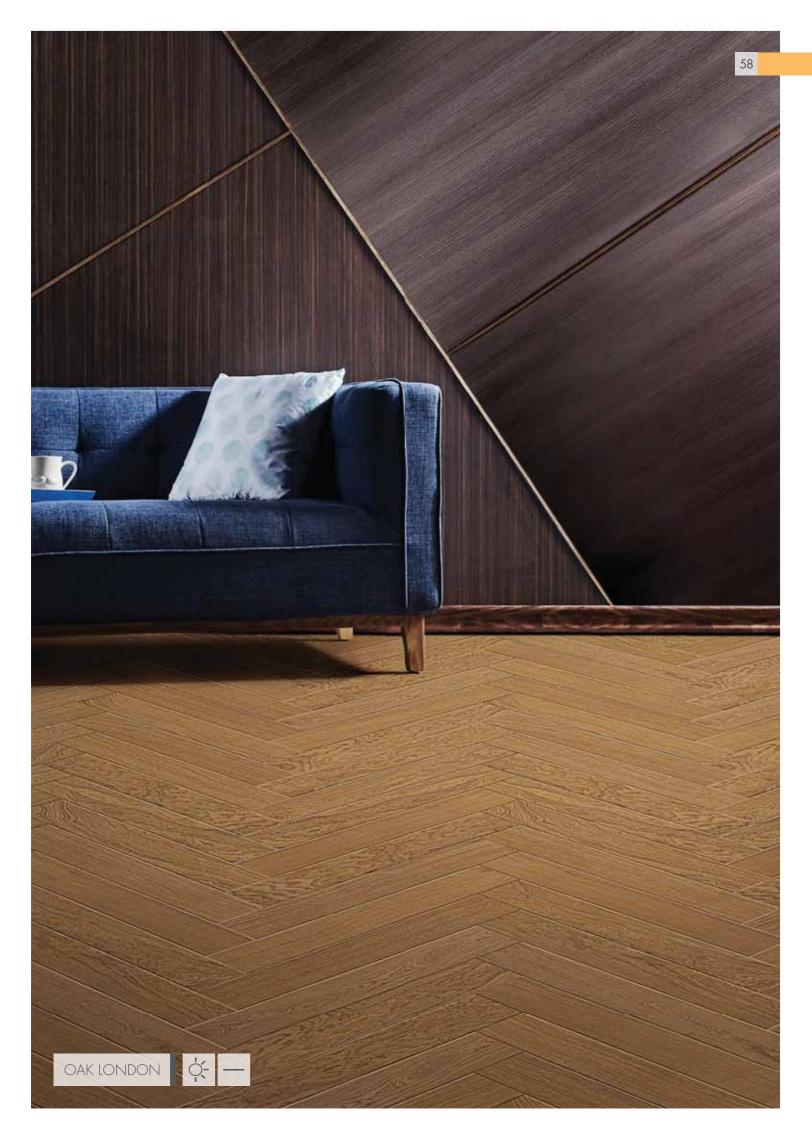

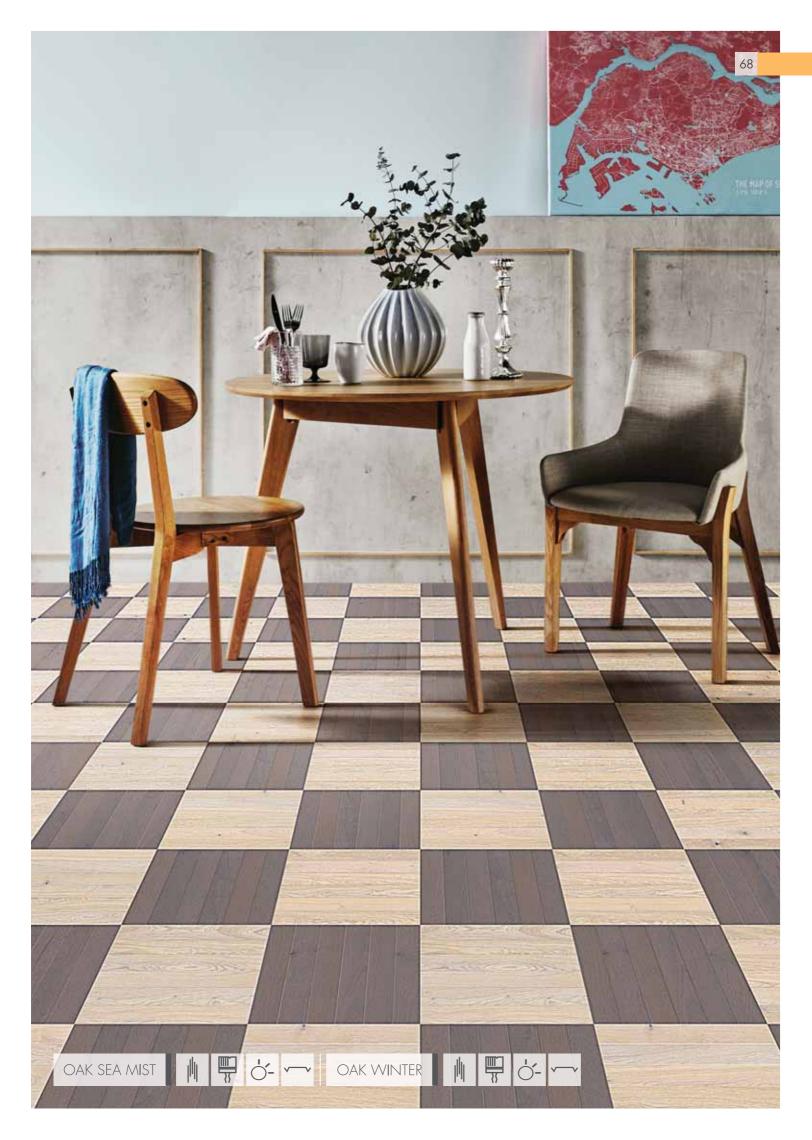

ARBOR 13mm

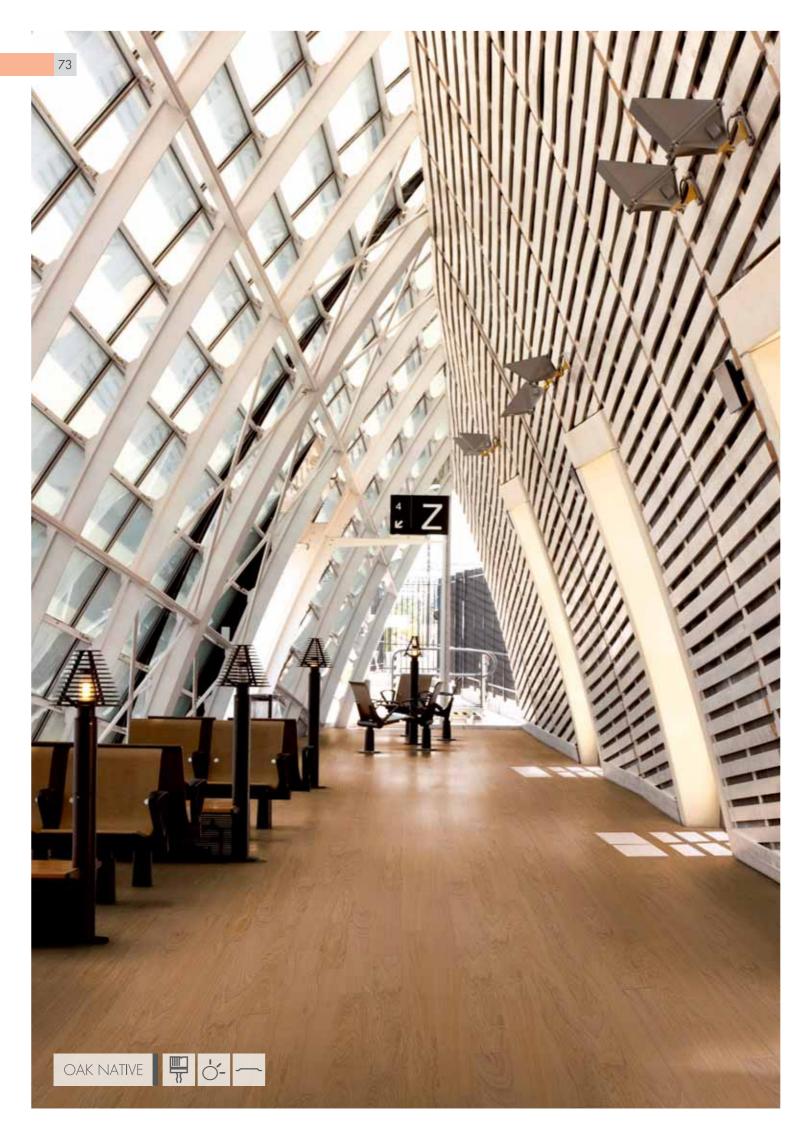

Distinct and eye-catching. Bold and inviting. Mikasa Arbor is our premium collection of 13mm flooring. Mikasa Arbor manifests itself in strikingly beautiful variety. Adorn your space with this exclusive collection and see any room come alive.

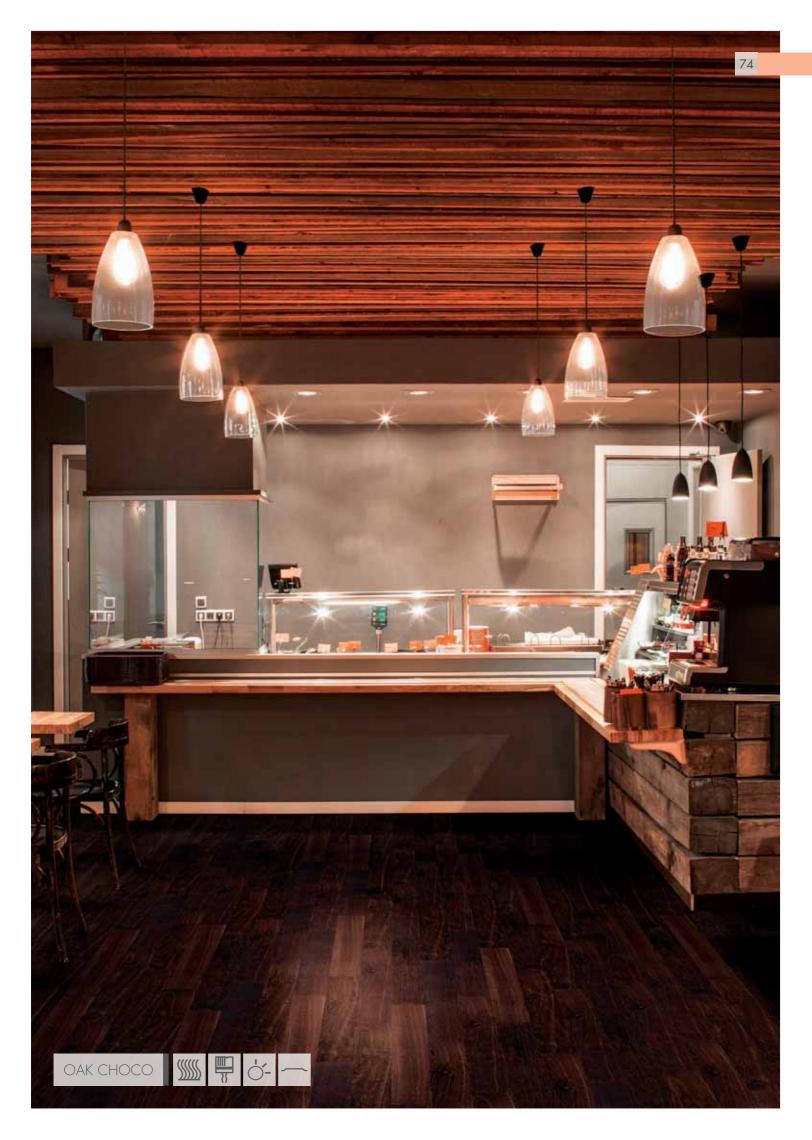

ARBOR ROVERE

Mikasa Rovere offers 1-Strip Oak in a wide range of finishes and treatments to grace your floors - Natural, Stained, Smoked, Brushed, and Satin. You are spoilt for choice.

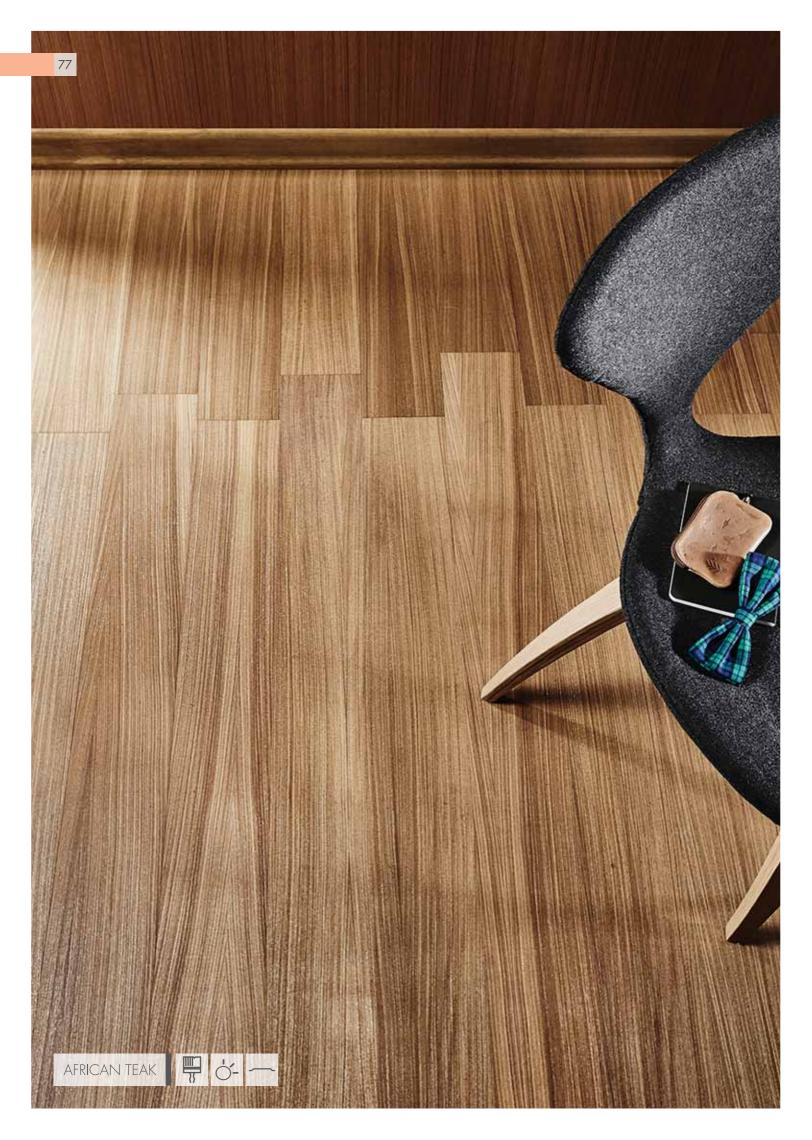

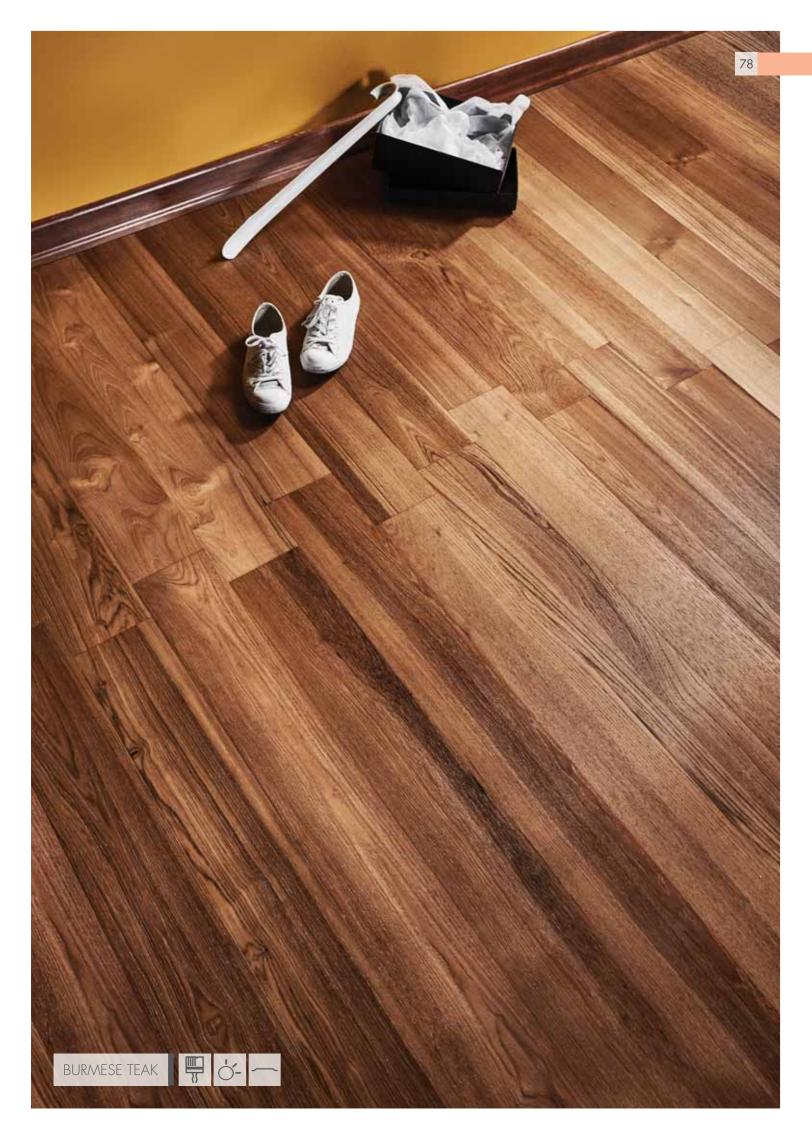

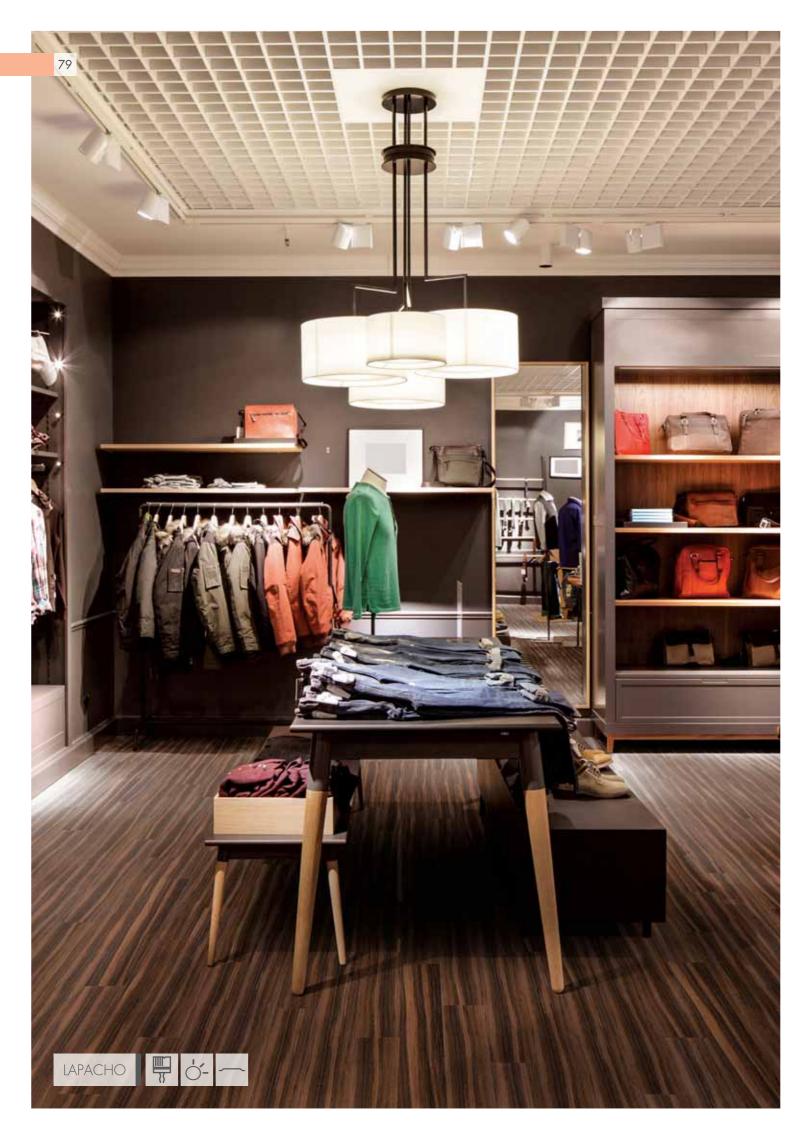

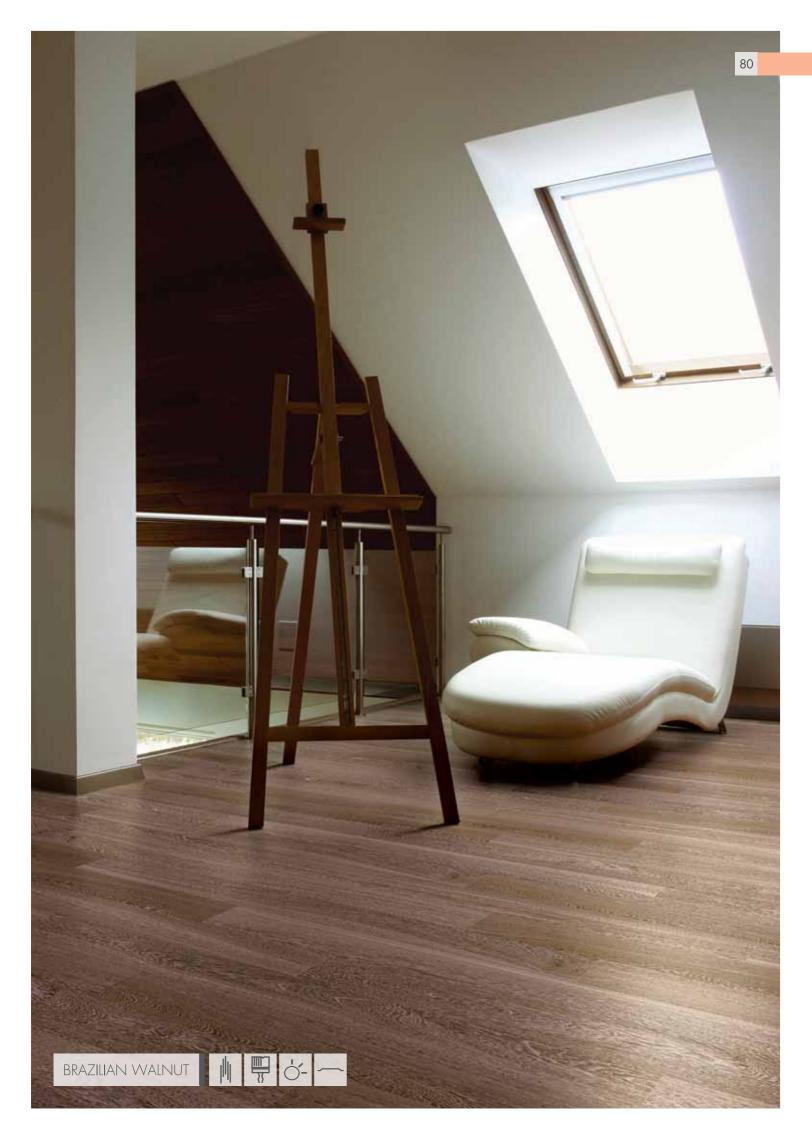

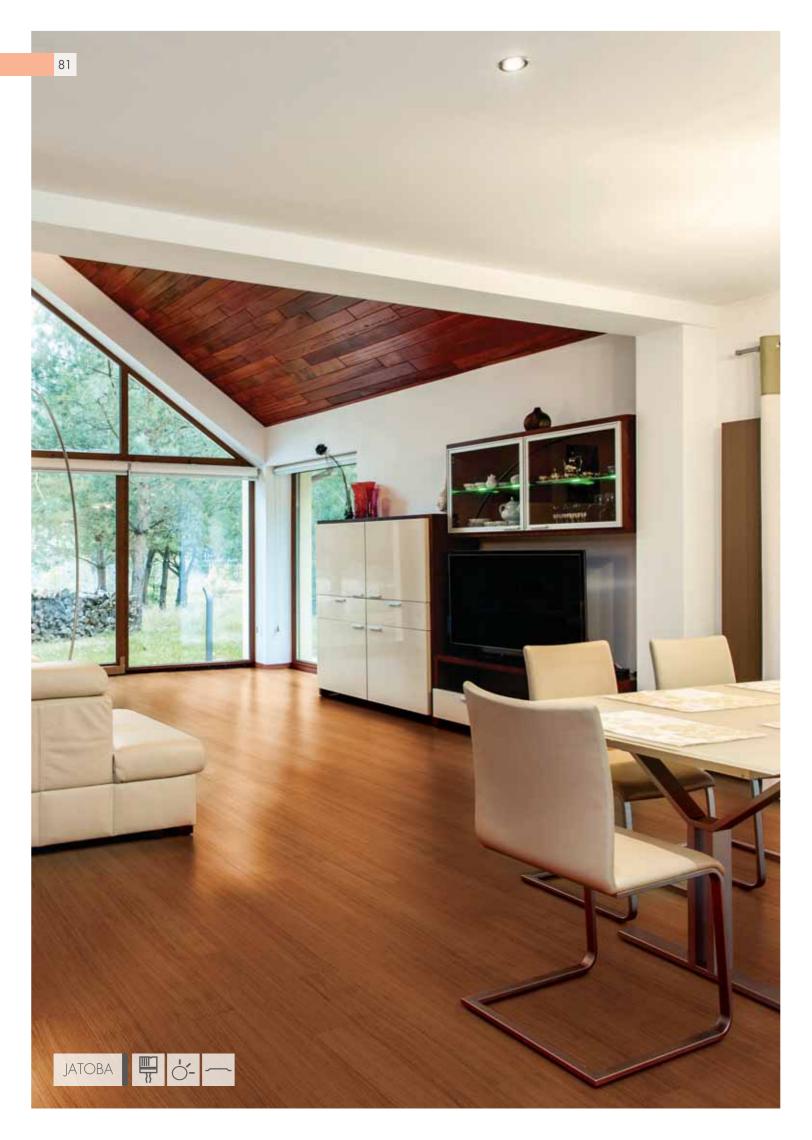

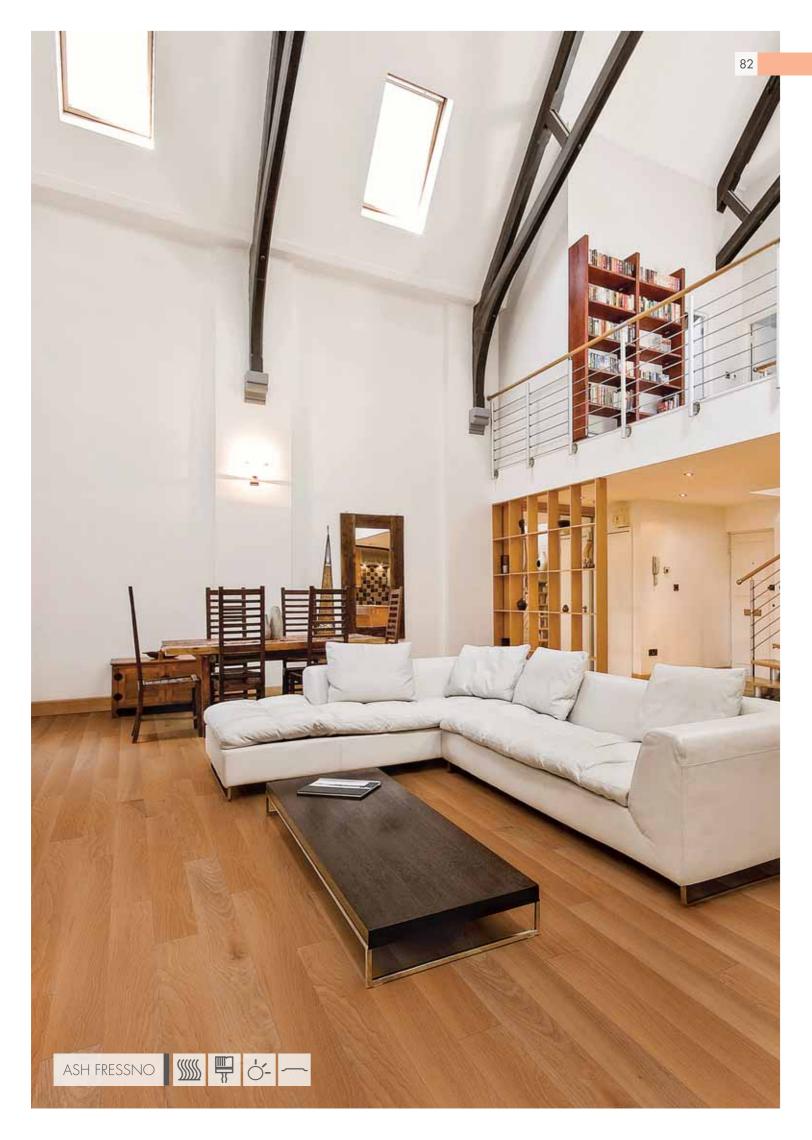

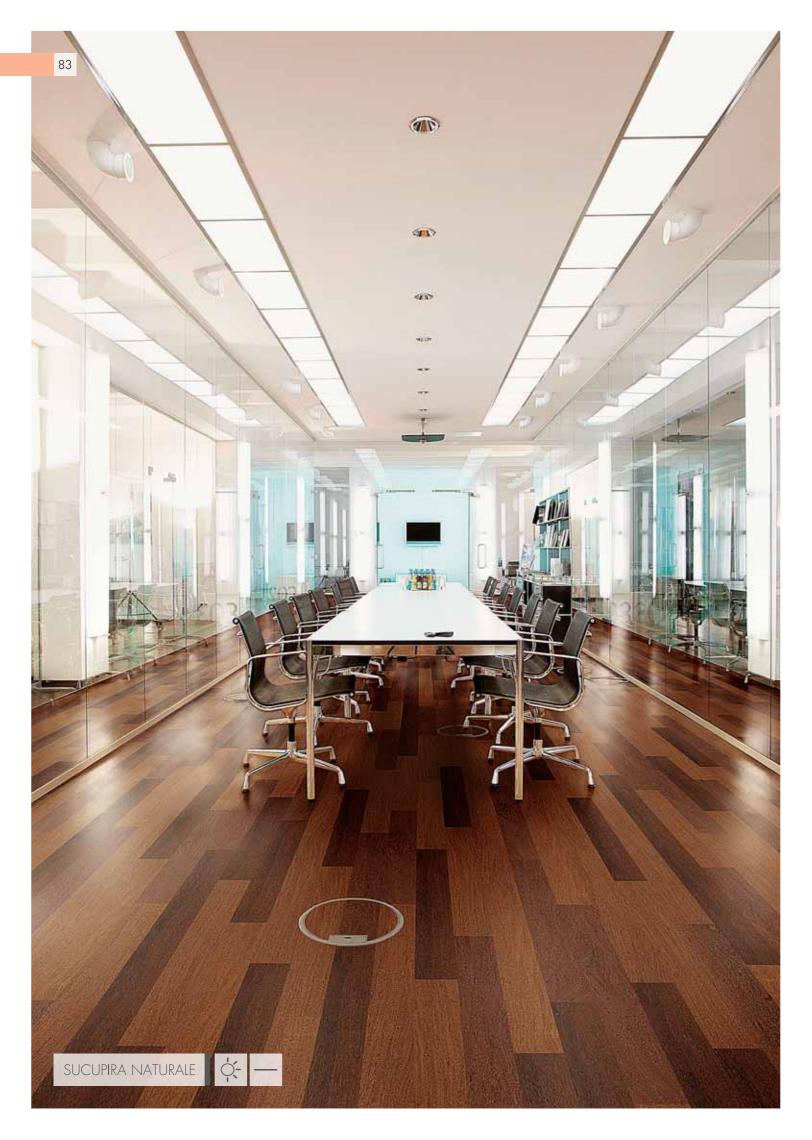

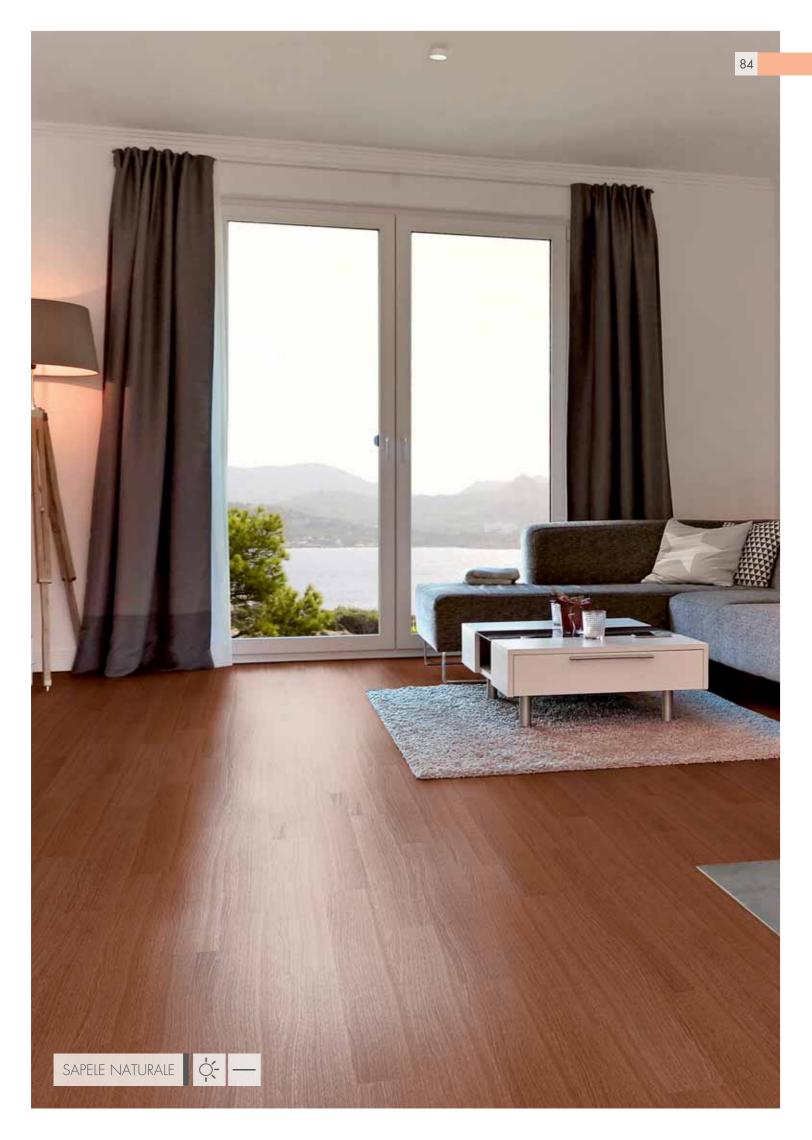

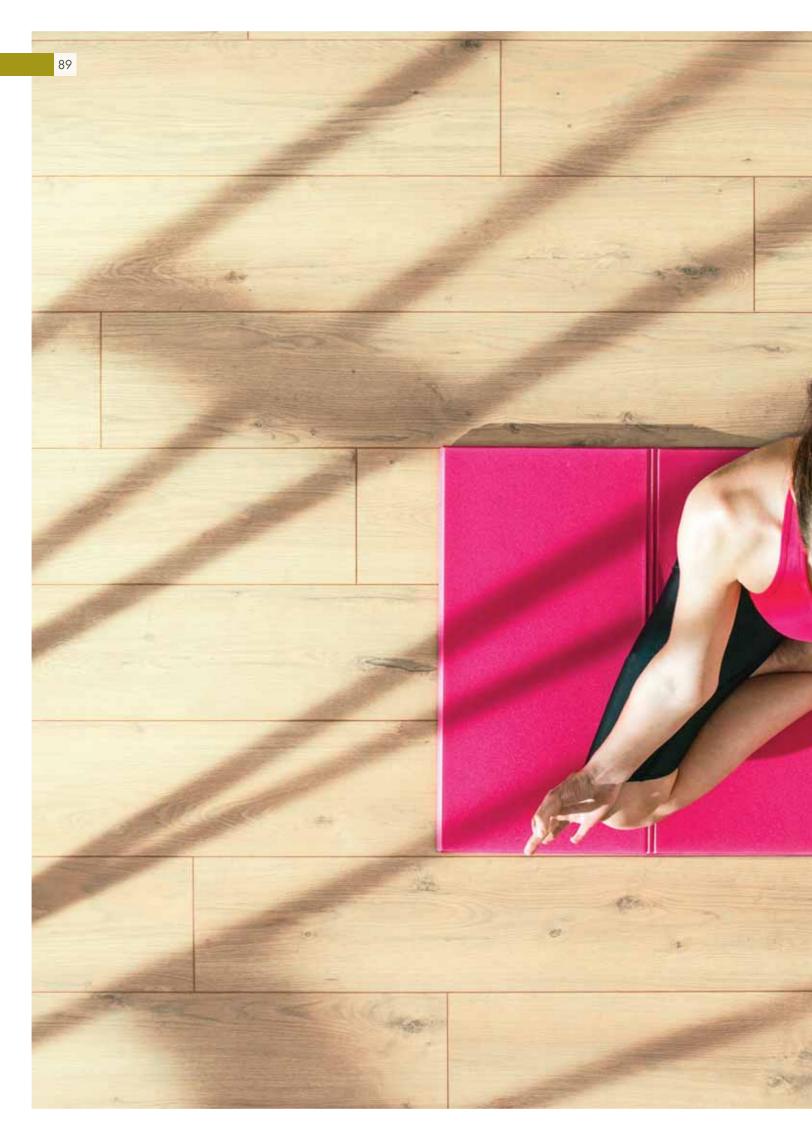

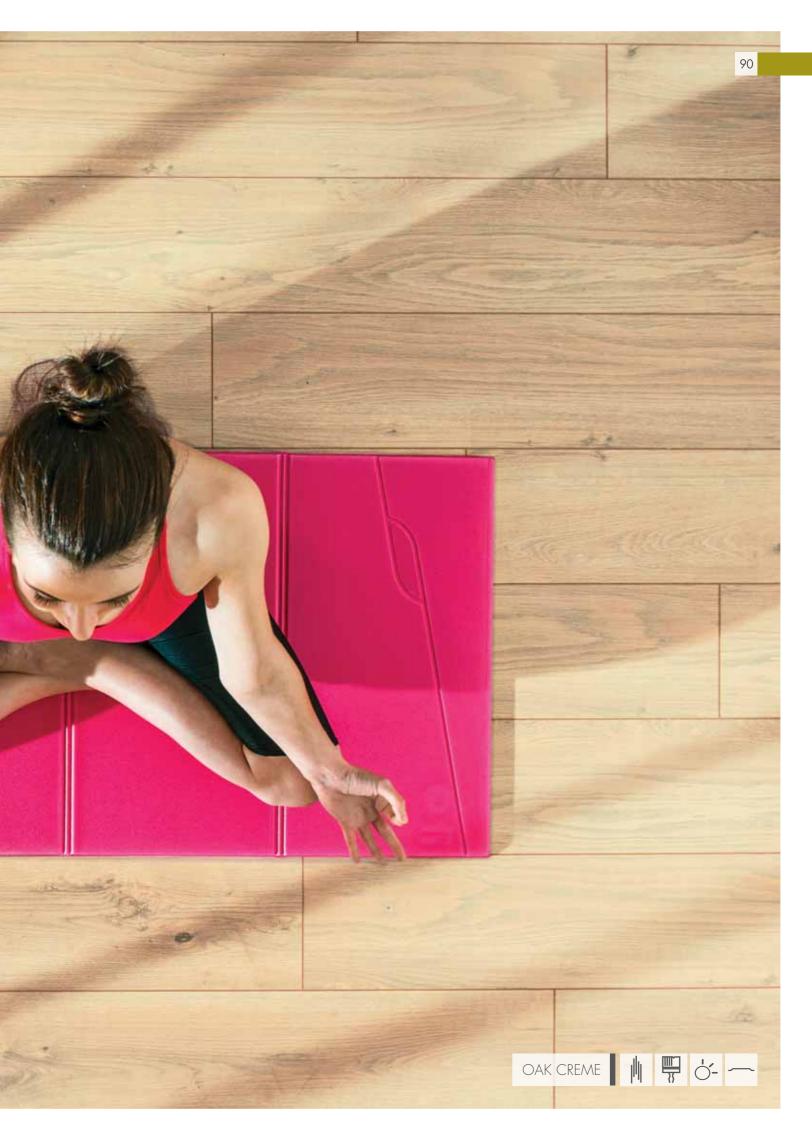

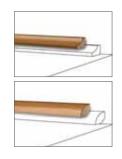

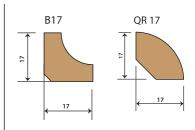

ACCESSORIES

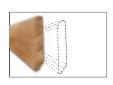

No floor is complete without matching accessories

Beading & Quadrant

Beading & Quadrant of solid wood is available in a variety of colours to suit your floor. They are suitable for every Mikasa floor of varying thickness. They are used when removing an existing skirting is not possible or if you do not want a very high skirting.

Skirting

Skirting adds the final touch to your Mikasa floors.

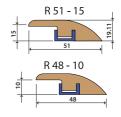

These complement every Mikasa floor of varying thickness.

Reducer Mouldings

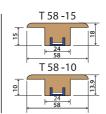

Reducer Mouldings are used to make a smooth transition between floors of differing heights. For example, where wooden floors meet other flooring materials such as stone floors or fitted carpets.

T-Mouldings

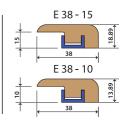

A type of moulding used in the transition between floors of the same height, where two rooms with identical flooring meet at a doorway. For example, hallways or bedrooms.

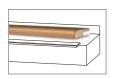

End Mouldings

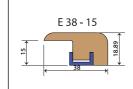

Most useful when your floor meets an immovable object such as a door casing. It can also be used to cover the gap between the wooden floor and the wall or the window.

Stair Noses

Used when your floor reaches a step down, creating a perfect end to every step in the staircase.

Underlay VAPR®TECT®

Mikasa **VAPR©TECT®** - a perfect combination of PE Film and extruded foam which acts as moisture and sound barrier, and an intermediate layer.

PRODUCT CHARACTERISTICS

Construction	Boards are constructed in 3 layers in order to minimize expansion and contraction within the floorboard. The direction of the fibers within each layer is oriented at right angles to the adjacent layer.			
Compliance	EN 14354			
Design	 2 & 3 strip plank with/without bevelled edges. MIKASA PlankLoc™ glueless joint on all edges. Surface layer consists of sliced strips of hardwood and a backing of pine/spruce veneer. 	1-strip plank, with/without bevelled edge, MIKASA PlankLoc™ glueless joint on all edges. Surface layer consists of sliced or rotary cut strips of hardwood and a backing of pine/spruce veneer.		
Top Layer	The top layer is made of select hardwood and is up to 3.0mm in thickness. This allows resanding and refinishing atleast twice. Detailed information about maintenance is included in our Maintenance & Repair Guide. Download it from our website www.mikasafloors.com	The top layer is made of hardwood and is up to 0.6 mm in thickness. This does not allow any resanding and refinishing. The surface is pre-finished with several layers of UV hardened acrylic lacquer, free from formaldehyde and solvents.		
Surface Finish	The surface is pre-finished with several layers of UV hardened acrylic lacquer, free from formaldehyde and solvents.			
Moisture Content	Average moisture content at delivery is approximately 7-9%.			
Insects	The boards are delivered free of insects, woodworms etc. This is secured by the process temperatures.			
Formaldehyde Emission	The boards comply more than adequately with the stringent EU E1 norms for formaldehyde emissions.			
Fire Classifications	Wooden floors fulfill the requirements for class G, the highest fire classification for floors as per Swedish Building Code, BBR 94.			
Reduction of sound weighted index 'footfall' to the room below. NF EN ISO 140-8/ Acc. to NF EN ISO 717-2, \(\Delta \text{Lw in dB with 3mm foam} \)	17dB			
Installation	Floating/Glued down			
Chemical and Stains	Resists most household stains up to 24 hours.			
Colour Change	Wood is a natural product and changes colour with time when exposed to light.			
Underfloor Heating Compatibility	Suitable for room temperature (max temperature waterborne system or self-regulating electrical s			
Subfloor Requirement	The Subfloor must be dry, clean, level and solid. The requirements in HusAMA98, Table 43.DC/-1 and MDB.3 apply. Also note our Subfloor Requirements. You can download more details on Subfloor Requirements and Underfloor Heating from our website www.mikasafloors.com
